

Introducing the VA Blue Button

The VA Blue Button – Select to view, print, download, or save your information from My HealthVet

The **Blue Button** is a new tool on My HealthVet (www.myhealth.va.gov). It allows easy access to your personal health information. You can view, print, download, or save your personal health information already in My HealthVet, and share this information with your health care team, caregivers, or others.

Downloading or printing your information is quick.

- If you are a registered user of My HealthVet you can log on and click on the Blue Button.
- Then you can view, print, download, or save your personal health information.
- If you have an upgraded My HealthVet account, called In-Person Authentication (IPA), your VA prescription history and VA Wellness Reminders may also be available.

Using the Blue Button is easy. All you need is a computer with Internet access.

- The Blue Button allows you to save your information to a safe location on your computer, a compact disc (CD), or thumb drive.
- If you want a paper copy of your information, you need access to a printer.
- For your protection, never save your information to a public computer or leave a printed copy unattended.
