

My HealtheVet: Opt In To Secure Messaging

Video Transcription – Full Video

(Time: 2:08)

MALE NARRATOR:

Isn't it funny how sometimes the most important things in your life can often feel like the most daunting?

Consider your health care. Appointments, prescriptions, reports and results...with so many things to remember, it can be hard to organize it all, so don't.

Let the Department of Veterans Affairs help you put it all together, in one place.

Go to myhealth.va.gov: an online personal health record designed for Veterans, Service members and Caregivers — putting you in control of your health needs. It's easy and it's free.

At My HealtheVet, you can safely and securely view VA lab results, log and track vital signs, get wellness reminders, view your VA appointments and fill VA prescription(s) without ever leaving your home or waiting on hold.

Simply opt in to Secure Messaging at My HealtheVet to easily communicate with your VA health care team.

Not sure where to go for care?

No problem. You can find that on My HealtheVet, too. And with all of this information at your fingertips, you can become a more active partner in your health care.

Have questions? By opting in to Secure Messaging with My HealtheVet, you can ask your VA health care team almost anything, at your convenience. Now that's technology and VA working for you.

And with the VA Blue Button on My HealtheVet, you can download your personal health data into one single file to save, store and share — with your family, Caregivers or non-VA providers.

So what are you waiting for?

Secure Messaging with My HealtheVet ensures the best health care experience for today's Veteran patient — all with the touch of a button.

Let My HealtheVet put your treatment well-being in your hands — opt in to Secure Messaging today.

My HealtheVet: see your personal health records, share your health information and learn how to be a better partner with your health care teams 24/7.

Don't delay, do it today!
